230%
INCREASE
IN NO

7 PLANT-BASED INGREDIENTS
CLINICALLY RESEARCHED
50MG DOSE

S7TM is a combination of seven
plant-based ingredients that has been
clinically shown to ignite your body's
own NO production system.

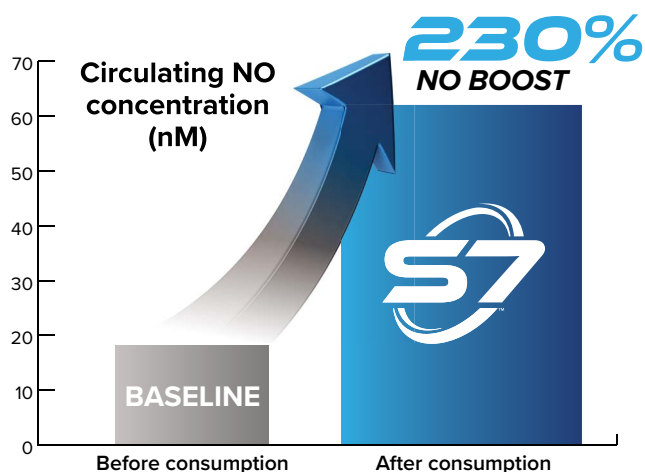

Ignite NO production without nitrates!

S7™ is not an ingested nitrate product, but instead a clinically researched plant-based sports nutrition ingredient that triggers the best kind of nitric oxide production — your body's own internal NO.

One 50mg dose of S7™ has been shown to deliver a surge of internal NO production at a significant rate.

Unlock your NO potential with S7™, a revolution in our understanding of what really fuels NO within the human body.

S7™ benefits and applications

ACUTE RESEARCH REPORT

PURPOSE:

In this pilot research study, FutureCeuticals measured the effects of S7™, a proprietary plant-based supplement, to document how it influences circulating, bioavailable NO concentration within healthy human participants.

PUBLISHED STUDY

Using the Gold Standard in Clinical Research:
Double-Blind, Placebo-Controlled, Crossover, Human Subjects

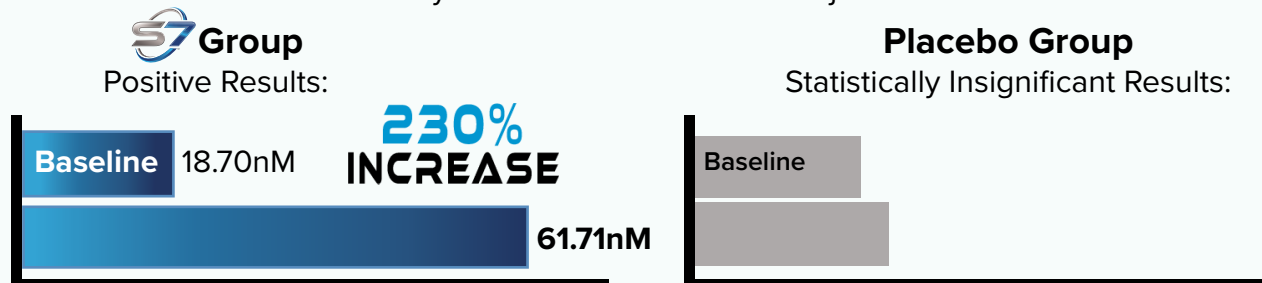

- 8 Healthy Subjects
- Subjects ranged in age from 24 to 55
- Placebo or 50mg S7™

THE RESULTS

Circulating NO Concentration (nM)

Analyzed in Blood of Human Subjects

Data are mean \pm SEM (n=8), *p < .05 vs placebo. S7™ resulted in statistically significant, dose-dependent increase of bioavailable NO concentration. Following administration of 50mg, S7™ was much greater in persons vs baseline value of NO.

CONCLUSION: S7™ has been clinically shown to stimulate endogenous NO levels in humans by 230%.

Coffeeberry®energy
ORGANIC COFFEE FRUIT CAFFEINE

A featured member of the Coffeeberry® line of coffee fruit products, **Coffeeberry® Energy** is a **natural stimulant** that delivers standardized levels of **organic caffeine combined with the native polyphenols** from the whole coffee fruit.

The result is a powerhouse energy ingredient like no other on the market.

elevATP®
STRENGTH. POWER. PERFORMANCE.

elevATP® is a patented, clinically-researched combination of ancient peat and our proprietary apple extract. Approved by Health Canada, elevATP® has been shown in multiple clinical studies to support **increased levels of mitochondrial ATP**, the energy currency of the body.

Unlike synthetic precursors and stimulants, **elevATP® is a non-stimulatory source of energy**, one that helps the body produce significantly higher levels of its own natural energy (ATP).

*Published functional research documents show elevATP® can significantly increase human strength, power and performance in resistance-trained athletes.**

*This statement has not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure, or prevent any disease.

Contact FutureCeuticals to identify the right clean-label, natural energy solution for your product formulation.

elevATP[®]

STRENGTH. POWER. PERFORMANCE.

elevATP[®], a combination of ancient peat and a proprietary apple extract, has been shown in clinical studies to increase serum levels of mitochondrial adenosine triphosphate (ATP), the energy currency of the body. Increased ATP in muscle tissues were also found.*

elevATP[®] is not exogenous ATP, but rather an ingredient that helps the body provide higher levels of ATP via its own internal mechanisms. In this way, elevATP[®] promotes non-stimulatory energy from the body's own mitochondria.*

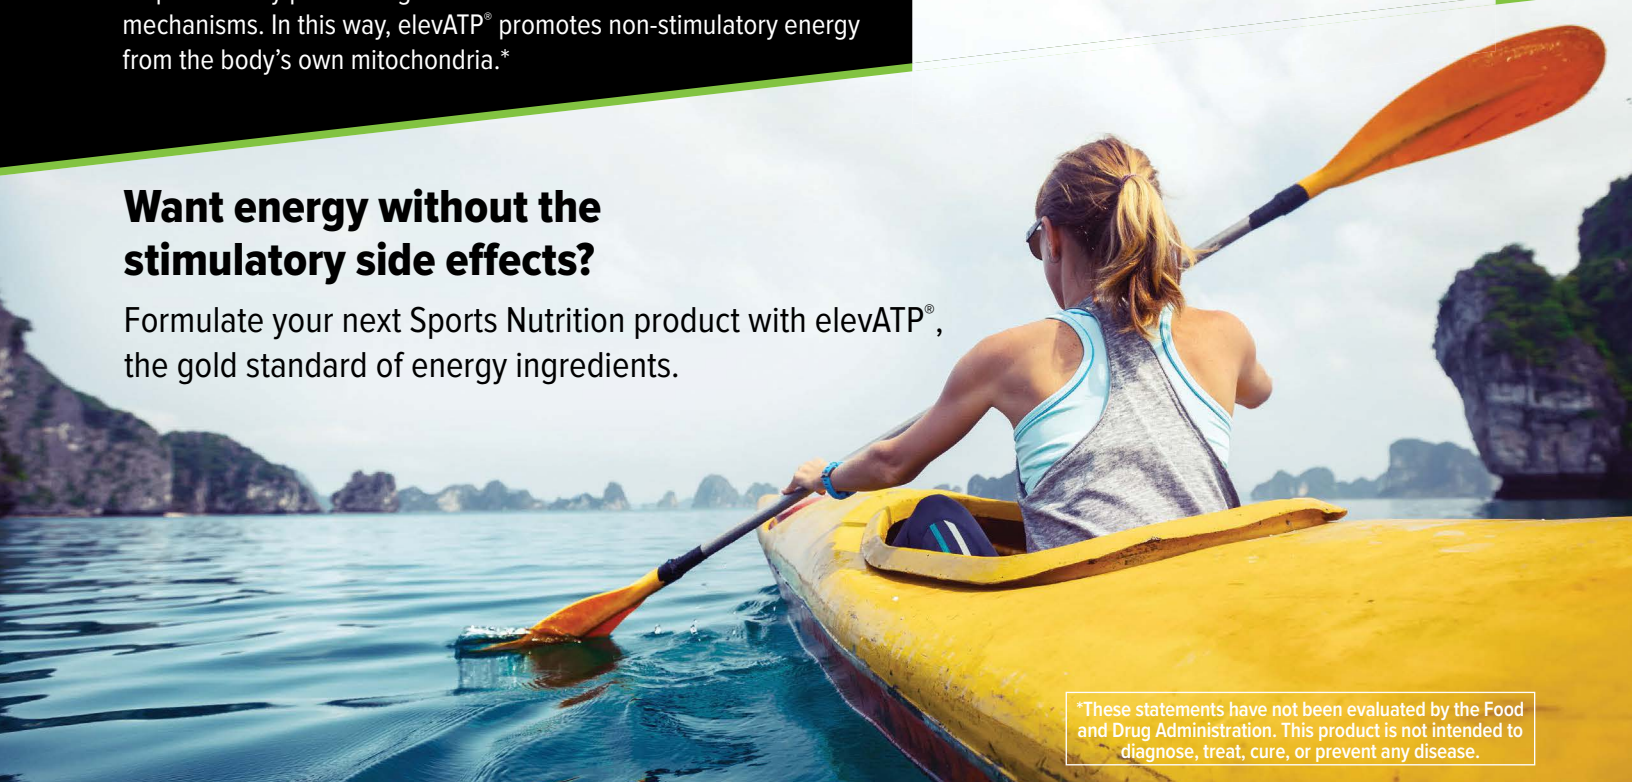

elevATP[®] supports increased levels of ATP*

Supplementation with 150mg of elevATP[®] resulted in significant increases in intracellular ATP in both whole blood and muscle tissue with no significant changes in ROS and lactate.

Want energy without the stimulatory side effects?

Formulate your next Sports Nutrition product with elevATP[®], the gold standard of energy ingredients.

FUNCTIONAL RESEARCH REPORT: elevATP®

Ancient peat and apple extracts supplementation may improve strength and power adaptations in resistance trained men

Jordan M. Joy, Roxanne M. Vogel, Jordan R. Moon, Paul H. Falcone, Matt M. Mosman, Zbigniew Pietrkowski, Tania Reyes and Michael P. Kim

BMC Complementary and Alternative Medicine
BMC series – open, inclusive and trusted 2016 16:224

DOI: 10.1186/s12906-016-1222-x | © The Author(s). | 2016

Received: 23 May 2016 | Accepted: 14 July 2016 | Published: 18 July 2016

Abstract

Background

Increased cellular ATP levels have the potential to enhance athletic performance. A proprietary blend of ancient peat and apple extracts has been supposed to increase ATP production. Therefore, the purpose of this investigation was to determine the effects of this supplement on athletic performance when used during 12 weeks of supervised, periodized resistance training.

Methods

Twenty-five healthy, resistance-trained, male subjects completed this study. Subjects supplemented once daily with either 1 serving (150 mg) of a proprietary blend of ancient peat and apple extract (TRT) or an equal-volume, visually-identical placebo (PLA) daily. Supervised resistance training consisted of 8 weeks of daily undulating periodized training followed by a 2 week overreach and a 2 week taper phase. Strength was determined using 1-repetition-maximum (1RM) testing in the barbell back squat, bench press (BP), and deadlift exercises. Peak power and peak velocity were determined during BP at 30 % 1RM and vertical jump tests as well as a 30s Wingate test, which also provided relative power (watt:mass)

Results

A group x time interaction was present for squat 1RM, deadlift 1RM, and vertical jump peak power and peak velocity. Squat and deadlift 1RM increased in TRT versus PLA from pre to post. Vertical jump peak velocity increased in TRT versus PLA from pre to week 10 as did vertical jump peak power, which also increased from pre to post. Wingate peak power and watt:mass tended to favor TRT.

Conclusions

Supplementing with ancient peat and apple extract while participating in periodized resistance training may enhance performance adaptations.

Trial Registration

ClinicalTrials.gov registration ID: NCT02819219, retrospectively registered on 6/29/2016

Complete Research Article

<http://www.biomedcentral.com/1472-6882/16/224>

Study Highlights:

25 healthy males who regularly weight train (typically capable of squatting and deadlifting 1.5X body weight and bench pressing 1X body weight).

14 subjects in the elevATP group; 11 in the placebo.

12 weeks long.

Subjects took either elevATP (150 mg) or placebo 45 minutes before workout or at a similar time on non-workout days. Measurements took place at week 4, 8, 10, and 12.

Power/Strength Results:

1. Increase in squat strength (load) +20.1 kg pre to post
2. Increase in dead lift strength (load) +25.4 kg pre to post
3. Increase in total strength (load): +57 kg gain in squat, dead lift and bench press combined pre to post
4. Increase in vertical jump peak power (power exerted)
5. Increase in vertical jump peak velocity (velocity generated)
6. More bench press reps than placebo at week 10

Body Composition Results:

1. Increase in size of cross sectional area
2. Increase in muscle thickness

Safety:

All blood measurements within normal parameters.

LONG-LASTING
BENEFITS IN AS
LITTLE AS 7 DAYS[†]**

Patented, low dose and fully soluble, FruiteX-B® is supported by over ten years of published research that establishes safety and statistically significant improvement in human joint comfort.

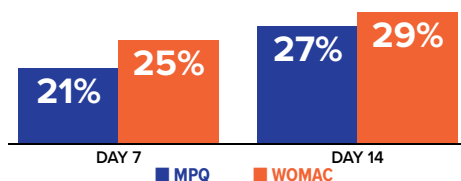

Could a molecule found in fruits, vegetables and legumes bring significant relief to active adults suffering from joint and flex discomfort?

FutureCeuticals delivers this molecule in supplements to improve flexibility and joint comfort.

FUNCTIONAL PUBLISHED RESEARCH SUMMARIES

FAST-ACTING JOINT AND MOBILITY SUPPORT IN AS LITTLE AS 7 DAYS[†]

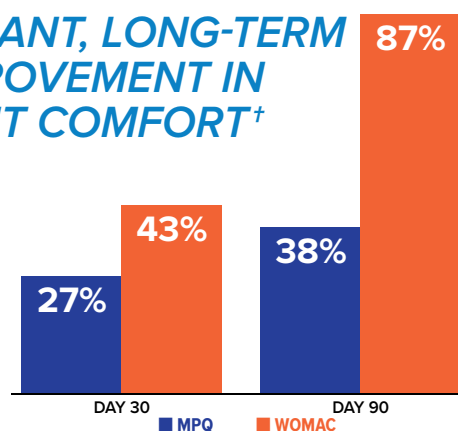

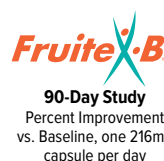

Short-term efficacy of FruiteX-B® calcium fructoborate on subjects with knee discomfort.

Goal: Determine short-term benefit of decreasing joint discomfort and improving physical mobility

Conclusion: Supplementation with 110mg calcium fructoborate twice per day was associated with improving knee discomfort during the two weeks of intake.

SIGNIFICANT, LONG-TERM IMPROVEMENT IN JOINT COMFORT[†]

Effects of once-daily versus twice daily dosing of FruiteX-B® calcium fructoborate on knee discomfort.

Goal: To evaluate the comparative effects of once-daily and twice-daily dosing of calcium fructoborate on knee joint discomfort for ninety days

Conclusion: Significant improvements have been shown in joint comfort with continued use of FruiteX-B® when studied over a long-term 90-day period of time.

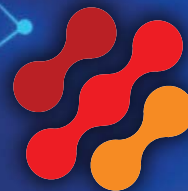

Symptoms of discomfort and joint function were assessed using the Western Ontario and McMaster Universities Arthritis Index (WOMAC) and the McGill Pain Questionnaire (MPQ).

NEUROFACTOR™

Natural Support for Brain Health

Derived from whole coffee fruit, NeuroFactor™ is clinically shown to **significantly increase levels of a key neuroprotein (BDNF)** vital to learning, memory, and higher thinking.

NEUROFACTOR™

Natural Support for Brain Health

WHAT IS NEUROFACTOR™?

NeuroFactor™ is a natural, patented extract derived from premium *Coffea arabica* coffee cherries. It contains a unique profile of polyphenols that has been shown in clinical studies to stimulate the production of **Brain-Derived Neurotrophic Factor** (BDNF), a key neuroprotein involved in overall brain health.

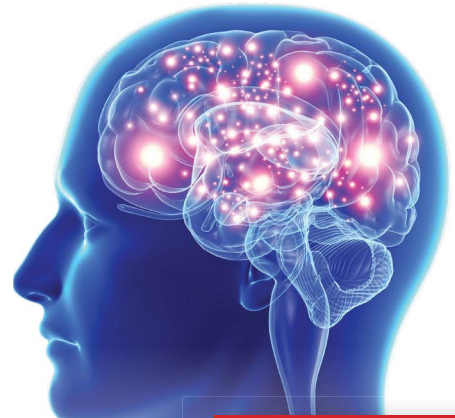

For centuries, coffee fruit has been a waste product of the traditional coffee process. FutureCeuticals discovered an **eco-friendly** path that preserves the whole fruit, and the unique polyphenols within, for the benefit of human health.

WHAT IS BDNF?

BDNF has been widely reported to play a **critical role** in the development, maintenance and repair of neurons, and protection against neuro-degeneration. Neuroscience now suggests that increased BDNF levels may help mitigate the advance of cognitive decline in human subjects.

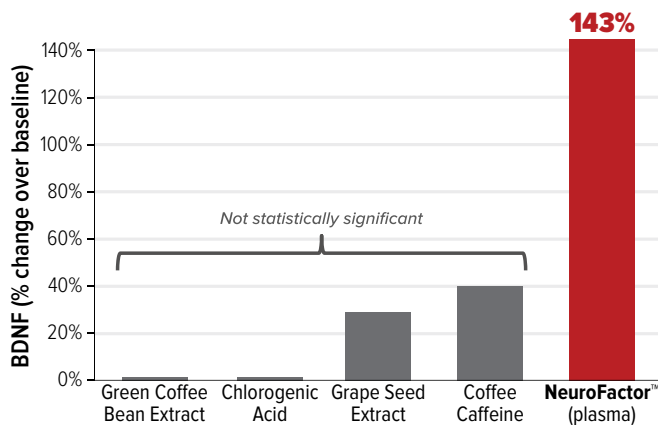

NeuroFactor™ is a natural botanical shown to **significantly increase** BDNF levels in two double blind, peer-reviewed studies of healthy human subjects.

Over 8,300 papers published on BDNF since 2014. pubmed.com

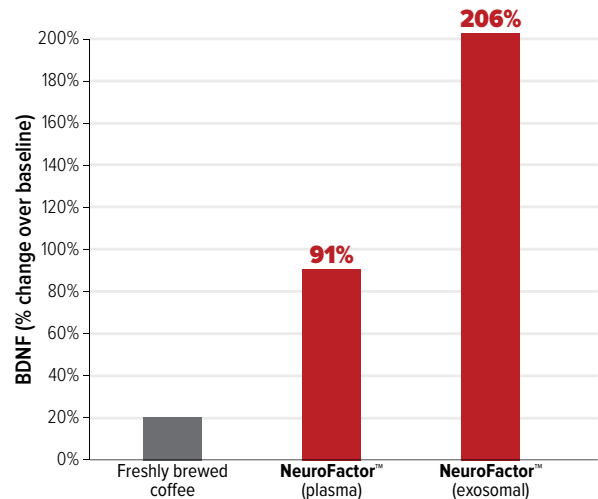

PUBLISHED CLINICAL STUDIES

NEUROFACTOR™ STUDY 1:

100mg of NeuroFactor™ stimulates significant production of BDNF within the human body. **Other coffee, caffeine, and polyphenol compounds do not work**, suggesting the unique polyphenol profile found within coffee fruit is responsible for naturally increasing BDNF.

NEUROFACTOR™ STUDY 2:

Larger subject size (N=20) still shows 100mg of NeuroFactor™ stimulates BDNF. Ingesting brewed coffee also did not show any significant increase. Further results showed BDNF present in exosomes, which have the ability to cross the blood-brain barrier (BBB).

These statements have not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure, or prevent any disease.

SpectraTM
ANTIOXIDANT ACTION.
NOT JUST POTENTIAL.

Stimulate antioxidant activity
within the human body

Support efficient cellular
oxygen consumption +

SpectraTM is a plant-based, scientifically validated formula of fruits, vegetables, and herbs shown to inhibit free radical production and optimize cellular metabolic activity within the human body.

Why formulate based on **potential**?
SpectraTM delivers low-dose antioxidant **action**.

CLEAN LABEL

GLUTEN FREE

ANTIOXIDANT ACTION. NOT JUST POTENTIAL.

Many fruit, vegetable and herbal concentrates and extracts have focused on antioxidant potential. However, science has struggled to prove the correlation between ORAC value and antioxidant activity in humans ... until now.

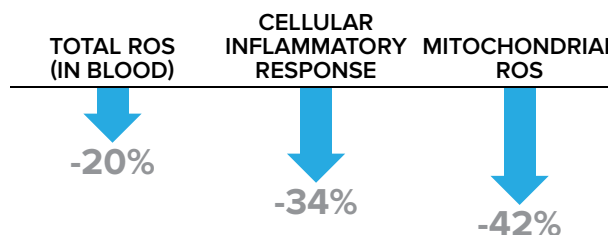

FUNCTIONAL RESEARCH SUMMARY

Spectra™ has been shown to decrease free radical (ROS) concentrations and production for two hours post-ingestion.*

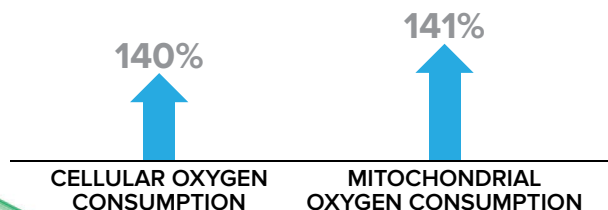

Free radical production, especially during exercise, can result in increased muscle inflammation and damage.

Spectra™ has been shown to uncouple the direct correlation between increased oxygen use and free radical production by increasing cellular and mitochondrial oxygen consumption while minimizing ROS. In this way, Spectra™ supports healthy cellular function in humans.†

STIMULATE ANTIOXIDANT ACTIVITY WITHIN THE HUMAN BODY

SUPPORT EFFICIENT CELLULAR OXYGEN CONSUMPTION

Spectra™ is the new standard in antioxidant health, providing an understanding of how fruits, vegetables and herbs positively impact physiological functions in the human body.

modcarb

REAL FUEL FROM REAL FOOD

enhance your protein experience

- ▶ Improves taste and texture
- ▶ Dispersible in solution
- ▶ USDA developed
- ▶ Stable across a broad range of applications
- ▶ Replaces stabilizers, artificial gums, fats and oils
- ▶ The preferred choice of the protein market's leading brands

An all-grain complex-carbohydrate food, ModCarb® is a breakthrough in energy and strength nutrition and supplementation. Created with six organic, healthy grains — oats, amaranth, buckwheat, chia, millet and quinoa — ModCarb® provides a real advantage for athletes in training. Because of its ability to mask off-flavor notes and enhance texture, ModCarb® is a great solution for product formulators looking to take advantage of protein's surge into mass market.

THE PROTEIN EXPERIENCE

Improve the flavor and texture of protein. By masking the off-tasting flavor notes, deliver an experience that mainstream consumers will enjoy.

HEALTHY CARBS

Contains muscle and energy sustaining essential macronutrients: carbohydrates, proteins, fats and lean muscle-building electrolytes.

SUSTAINED ENERGY

The unique grain matrix of ModCarb® delivers low glycemic index complex carbohydrates that help ensure modulated absorption and gradual utilization by the body. As a result, ModCarb® can help to extend performance and prevent a subsequent "sugar crash."

**TAKE OUR
PROTEIN
CHALLENGE**

DELIVER CLEAN LABEL FUNCTIONALITY WITH BEVERAGE-READY GRAINS

Enhance your beverage experience with
gluten-free, organic grain-based hydrocolloids.

- Improves taste and texture
- Dispersible in solution
- USDA-developed process
- Stable across a broad range of applications
- Replaces stabilizers, artificial gums, fats and oils

GRAINS WITHOUT THE GRIT™

Delivers prebiotic and FDA heart health benefits

Delivers protein and all essential amino acids

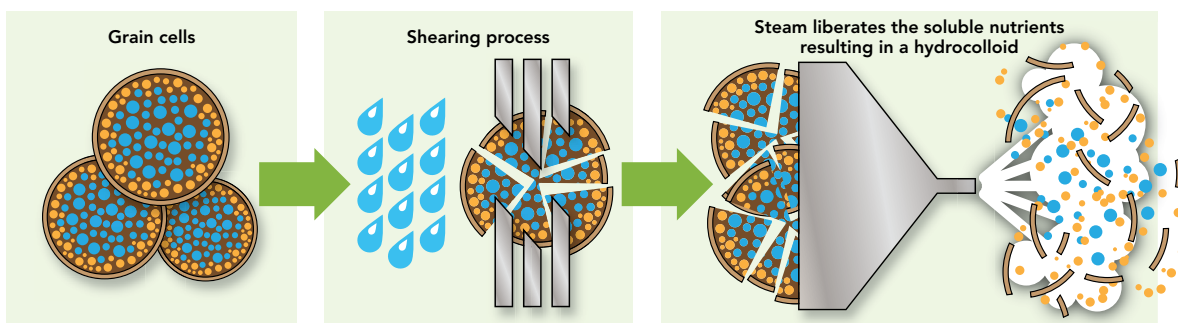

Delivers the nutritional power of five whole grains

Promotes energy from six grain-based complex carbs

THE BEVERAGE-READY PROCESS

Each grain we use undergoes a mechanical (non-enzymatic) process that shatters the tough cell wall and liberates the highly soluble matrix of nutrients, creating a free-flowing hydrocolloid-like material. The gritty sensation of these grains is eliminated, which delivers an exceptional texture and flavor experience to your clean-label product.

VERSATILE GRAINS

Each of our branded grains allows you to enhance your formulation with improved taste, texture and nutrition. FutureCeuticals' line of Beverage-Ready Grains can be used in a wide variety of applications, to deliver a natural, gluten-free hydrocolloid that reduces the need for non-natural additives.

PROTEIN

Improve the flavor and texture of protein. By masking the off-tasting flavor notes, deliver an experience that mainstream consumers will enjoy.

MEAL REPLACEMENT AND SPORTS NUTRITION

Provide low glycemic index carbs for sustained energy.

DAIRY OR DAIRY ALTERNATIVES

Deliver flavor, function, and a smooth, creamy texture without lactose allergen concerns.

CLEAN LABEL

Replace stabilizers, artificial gums, fats, and oils for a more natural label.

All beverage-ready grains are available organic and gluten free.

By using specific amounts of Nutrim® in your formulations, your product can qualify for the FDA Heart Health Claim.

TAKE OUR GRAINS WITHOUT THE GRIT™ CHALLENGE

Contact us for a sample and see for yourself how our grains transform the flavor and texture of your next functional clean-label product.

FutureCeuticals, Inc. is an industry leader in the research, development and manufacture of fruit, vegetable, and grain-based products for the functional food, cosmetics, and dietary supplement markets.

With over 1,300 conventional and 300 certified organic acres of farmland and over 1,000,000 square feet of manufacturing and research facilities in Illinois, Indiana, Wisconsin, California, Europe, and South America, we are vertically integrated from field to finished product and offer a comprehensive line of fruit, vegetable, and grain-based powders and extracts.

FutureCeuticals' mission is to deliver the highest quality fruit, vegetable, grain-based, and clinically researched solutions to our partners, making it easy for them to deliver on the consumer promise of healthy products. Whether backed by science or 160 years of agricultural experience, we provide clean label transparency and highly marketable claims.
